

Open Bee™ Scan O.C.S - User guide

Description Release note Documentation

Open Bee™ Scan OCS (O.C.R. Conversion Service) is a service that extracts the textual elements of documents. This service is a component of the digital document management application of Open Bee™ Portal.

Open Bee™ Scan OCS performs various types of operations:

- the extraction of documents text to allow full-text search,
- converting a document into a PDF file or thumbnail images to enable the preview,
- signing a document..

The user is not able to work directly with the tool **Open Bee™ Scan OCS** which is a software component of **Open Bee™ Portal**.

However, [an administrator interface](#) displaying the operations status and allowing to perform administrative tasks is available in **Open Bee™ Portal**.

Download latest version

Version 6.8.2 - Feb. 2018

Please read our Hardware and software prerequisites and installation guide before any installation or upgrade.
